

Landing Auditor Report

<https://freecourse.io>

Score: 38/100

Priority Fixes

Primary CTA has no inspectable destination

Update Post-click funnel QA: Use a real link or form submit path so visitors, crawlers, analytics, and QA can verify the conversion path. Validate by: Re-run the audit and confirm this finding is resolved: Primary CTA has no inspectable destination.

Potential element overlap detected

Update rendered viewport: Inspect stacked/absolute/absolute/absolute/absolute elements at mobile and desktop breakpoints and remove incoherent overlaps. Validate by: Re-run the audit and confirm this finding is resolved: Potential element overlap detected.

Potential text contrast risks detected

Update mobile viewport: Increase foreground/background contrast for text and CTA states. Validate by: Re-run the audit and confirm this finding is resolved: Potential text contrast risks detected.

Small mobile text detected

Update mobile viewport: Raise body/support text sizes and line-height for mobile readability. Validate by: Re-run the audit and confirm this finding is resolved: Small mobile text detected.

Small mobile tap targets detected

Update mobile viewport: Give mobile buttons and links at least a 44px touch area with enough spacing. Validate by: Re-run the audit and confirm this finding is resolved: Small mobile tap targets detected.

Findings

High: Primary CTA has no inspectable destination

Primary CTA is "Explore Courses" with no href. Use a real link or form submit path so visitors, crawlers, analytics, and QA can verify the conversion path.

High: Potential element overlap detected

16 visible element overlaps were detected in the rendered viewport.

18 of 19 images lack usable srcset/sizes metadata.
Serve responsive image candidates with srcset and sizes so mobile visitors avoid desktop-sized downloads.

Medium: Render-blocking scripts detected

3 blocking scripts were extracted.
Add defer or async where safe and move noncritical scripts below first render.

Medium: Desktop request-count proxy is heavy

120 local browser requests were captured.
Remove noncritical tags and consolidate low-value assets.

Medium: All images are lazy-loaded

All 19 images use lazy loading.
Do not lazy-load the hero or likely LCP image.

Medium: Mobile request-count proxy is heavy

89 local browser requests were captured.
Remove noncritical tags and consolidate low-value assets.

Low: Submitted page is absent from sitemap

Sitemap has 12 URLs but not this page.
Include important canonical landing pages in the XML sitemap.

Low: Some responsive images lack sizes

1 images use srcset without sizes.
Add sizes when srcset uses width descriptors so browsers choose the right candidate.

Low: No cache validators were captured

Neither ETag nor Last-Modified was present.
Add ETag or Last-Modified so repeat visits can revalidate efficiently.
