

# Landing Auditor Report

<https://mixdroid-web.vercel.app/>

**Score: 45/100**

## Priority Fixes

### ***Small mobile text detected***

Update mobile viewport: Raise body/support text sizes and line-height for mobile readability. Validate by: Re-run the audit and confirm this finding is resolved: Small mobile text detected.

### ***Small mobile tap targets detected***

Update mobile viewport: Give mobile buttons and links at least a 44px touch area with enough spacing. Validate by: Re-run the audit and confirm this finding is resolved: Small mobile tap targets detected.

### ***Long readable line lengths detected***

Update typography: Constrain paragraph width to roughly 50-75 characters per line and split dense copy blocks. Validate by: Re-run the audit and confirm this finding is resolved: Long readable line lengths detected.

### ***Form action is missing or empty***

Update Technical form audit: Confirm the form posts reliably after JS failures and analytics blockers. Validate by: Re-run the audit and confirm this finding is resolved: Form action is missing or empty.

### ***Multiple forms increase friction***

Update CRO friction review: Keep the primary conversion form singular and clear. Validate by: Re-run the audit and confirm this finding is resolved: Multiple forms increase friction.

## Findings

### ***Medium: Small mobile text detected***

41 text elements are below the readable mobile threshold.  
Raise body/support text sizes and line-height for mobile readability.

### ***Medium: Small mobile tap targets detected***

21 interactive elements are below recommended touch size.  
Give mobile buttons and links at least a 44px touch area with enough spacing.

### ***Medium: Long readable line lengths detected***

2 text blocks exceed readable line-length thresholds.  
Constrain paragraph width to roughly 50-75 characters per line and split dense copy blocks.

***Medium: Form action is missing or empty***

2 forms have no action URL.  
Confirm the form posts reliably after JS failures and analytics blockers.

***Medium: Multiple forms increase friction***

2 forms were extracted.  
Keep the primary conversion form singular and clear.

***Medium: Hero copy is likely overloaded***

Hero container has about 88 words.  
Compress the hero to one sharp promise, one supporting sentence, and a visible CTA.

***Medium: Most raster images use legacy formats***

3 of 3 images appear to use JPG, PNG, GIF, or JPEG.  
Use AVIF/WebP where quality allows, with fallbacks for critical images.

***Medium: Most images are not responsive***

3 of 3 images lack usable srcset/sizes metadata.  
Serve responsive image candidates with srcset and sizes so mobile visitors avoid desktop-sized downloads.

***Low: No cache validators were captured***

Neither ETag nor Last-Modified was present.  
Add ETag or Last-Modified so repeat visits can revalidate efficiently.
