

Landing Auditor Report

<https://www.agentui.ai/en/>

Score: 41/100

Priority Fixes

Render-blocking scripts detected

Update Lighthouse diagnostics: Add defer or async where safe and move noncritical scripts below first render. Validate by: Re-run the audit and confirm this finding is resolved: Render-blocking scripts detected.

Images are missing reserved dimensions

Update Lighthouse CLS diagnostics: Set width and height or aspect-ratio to reduce layout shift. Validate by: Re-run the audit and confirm this finding is resolved: Images are missing reserved dimensions.

Too many network requests

Update Semrush Performance report pattern: Remove noncritical third-party tags and combine or defer low-value assets. Validate by: Re-run the audit and confirm this finding is resolved: Too many network requests.

JavaScript file count is high

Update Semrush JS/CSS report pattern: Remove low-value scripts and split noncritical code away from the landing page. Validate by: Re-run the audit and confirm this finding is resolved: JavaScript file count is high.

Too many third-party origins

Update web.dev third-party JavaScript guidance: Consolidate analytics, widgets, fonts, and embeds; keep only origins that directly support conversion. Validate by: Re-run the audit and confirm this finding is resolved: Too many third-party origins.

Too many third-party requests

Update Lighthouse third-party impact pattern: Keep only conversion-critical third-party scripts on the landing page. Validate by: Re-run the audit and confirm this finding is resolved: Too many third-party requests.

Findings

Critical: Render-blocking scripts detected

4 blocking scripts were extracted.
Add defer or async where safe and move noncritical scripts below first render.

High: Images are missing reserved dimensions

1 of 2 images lack width and height.
Set width and height or aspect-ratio to reduce layout shift.

High: Too many network requests

168 requests were captured.
Remove noncritical third-party tags and combine or defer low-value assets.

High: JavaScript file count is high

24 external scripts were extracted.
Remove low-value scripts and split noncritical code away from the landing page.

High: Too many third-party origins

10 third-party domains were captured.
Consolidate analytics, widgets, fonts, and embeds; keep only origins that directly support conversion.

High: Too many third-party requests

56 third-party requests were captured.
Keep only conversion-critical third-party scripts on the landing page.

High: Form controls lack labels

1 of 1 controls lack a label or accessible name.
Associate every input, select, and textarea with a visible label or aria-label.

High: Sticky overlay takes too much mobile space

Sticky overlay covers 72% of the mobile viewport.
Reduce or dismiss sticky bars/popups so the CTA and value prop remain readable.

High: Primary CTA has no inspectable destination

Primary CTA is "Book a Call" with no href.
Use a real link or form submit path so visitors, crawlers, analytics, and QA can verify the conversion path.

High: Potential element overlap detected

17 visible element overlaps were detected in the rendered viewport.
Inspect stacked/absolute/absolute/absolute elements at mobile and desktop breakpoints and remove incoherent overlaps.

Medium: Content Security Policy is missing

No Content-Security-Policy header was captured.
Add a CSP to reduce script injection and framing risk.

Medium: HSTS header is missing

No Strict-Transport-Security header was captured.
Add HSTS after HTTPS is stable across the site.

Medium: External target=_blank links miss noopener/noreferrer

1 external new-tab links lack rel protection.
Add rel="noopener" or rel="noreferrer" to external links that open in a new tab.

Medium: Likely hero/LCP image lacks high fetch priority

First image is "/nvidia-inception.svg" without fetchpriority="high".
Add fetchpriority="high" to the LCP image or preload the correct responsive candidate.

Medium: Most images are not responsive

2 of 2 images lack usable srcset/sizes metadata.
Serve responsive image candidates with srcset and sizes so mobile visitors avoid desktop-sized downloads.

Medium: No preconnect hints for third parties

56 third-party requests and 0 preconnect hints.
Preconnect only to critical third-party origins used during first render.

Medium: Missing canonical URL

No canonical link was extracted.
Add a self-referencing canonical URL for this landing page.

Medium: Duplicate HTML IDs found

2 duplicate ID values were found.
Make IDs unique so labels, anchors, and ARIA references resolve correctly.

Medium: Potential text contrast risks detected

2 text elements have contrast risk.
Increase foreground/background contrast for text and CTA states.

Medium: Mobile hero consumes too much vertical space

Hero height is 23.28x the viewport height.
Reduce hero padding/media height so headline, value prop, and CTA appear together.
