Score: 47/100

Priority Fixes

Render-blocking scripts detected

Update Lighthouse diagnostics: Add defer or async where safe and move noncritical scripts below first render. Validate by: Re-run the audit and confirm this finding is resolved: Render-blocking scripts detected.

Primary CTA is not visible above the mobile fold

Update mobile viewport: Move one high-intent CTA into the first mobile viewport and keep support text nearby. Validate by: Re-run the audit and confirm this finding is resolved: Primary CTA is not visible above the mobile fold.

FAQ answers are fully expanded by default, creating excessive vertical length and forcing users to scroll through large blocks of text before reaching the Feature Comparison

Update Frequently Asked Questions section, lower half of page: Convert the FAQ into an accordion so only questions are visible; reveal answers on click or tap to reduce cognitive load and scroll depth. Validate by: Re-run the audit and confirm this finding is resolved: FAQ answers are fully expanded by default, creating excessive vertical length and forcing users to scroll through large blocks of text before reaching the Feature Comparison.

Hero copy is likely overloaded

Update Five-second-test UX pattern: Compress the hero to one sharp promise, one supporting sentence, and a visible CTA. Validate by: Re-run the audit and confirm this finding is resolved: Hero copy is likely overloaded.

Findings

Critical: Render-blocking scripts detected

4 blocking scripts were extracted.

Add defer or async where safe and move noncritical scripts below first render.

High: Primary CTA is not visible above the mobile fold

The local mobile render did not find a primary CTA inside the initial viewport.

Move one high-intent CTA into the first mobile viewport and keep support text nearby.

Medium: FAQ answers are fully expanded by default, creating excessive vertical length and forcing users to scroll through large blocks of text before reaching the Feature Comparison

All six FAQ entries display their complete answers permanently open with no expand/collapse controls, accordion arrows, or hide buttons visible anywhere in the section
Convert the FAQ into an accordion so only questions are visible; reveal answers on click or tap to reduce cognitive load and scroll depth

Medium: Hero copy is likely overloaded

Hero container has about 762 words.
Compress the hero to one sharp promise, one supporting sentence, and a visible CTA.

High: Images are missing reserved dimensions

6 of 7 images lack width and height.
Set width and height or aspect-ratio to reduce layout shift.

High: Weak image alt coverage

7 of 7 images have empty or missing alt text.
Add descriptive alt text to informative images and empty alt only for decorative images.

High: Form controls lack labels

1 of 1 controls lack a label or accessible name.
Associate every input, select, and textarea with a visible label or aria-label.

High: Images need better alt text

7 of 7 images have empty or missing alt text.
Give informative images descriptive alt text and mark decorative images with empty alt.

Medium: Content Security Policy is missing

No Content-Security-Policy header was captured.
Add a CSP to reduce script injection and framing risk.

Medium: HSTS header is missing

No Strict-Transport-Security header was captured.
Add HSTS after HTTPS is stable across the site.

Medium: Likely hero/LCP image lacks high fetch priority

First image is "/images/MJA Workflow 2.jpg" without fetchpriority="high".
Add fetchpriority="high" to the LCP image or preload the correct responsive candidate.

Medium: Most images are not responsive

7 of 7 images lack usable srcset/sizes metadata.
Serve responsive image candidates with srcset and sizes so mobile visitors avoid desktop-sized downloads.

Medium: Duplicate HTML IDs found

1 duplicate ID values were found.
Make IDs unique so labels, anchors, and ARIA references resolve correctly.

Medium: Heading levels are skipped

1 heading order jumps were found.
Use headings in order so screen reader users can understand the page structure.

Medium: Main landmark is missing

No <main> or role="main" landmark was extracted.
Wrap primary page content in one main landmark.

Medium: Desktop console errors were captured

1 console errors occurred during render.
Fix client-side runtime errors before interpreting conversion or SEO behavior.

Medium: Mobile console errors were captured

1 console errors occurred during render.
Fix client-side runtime errors before interpreting conversion or SEO behavior.

Medium: Multiple Google measurement containers detected

Detected GA/GTM IDs: G-9TT68PL0TM, g-recaptcha.
Confirm whether each tag is intentional and remove duplicate page_view or conversion firing paths.

Low: X-Content-Type-Options is missing

No X-Content-Type-Options header was captured.
Add X-Content-Type-Options: nosniff.

Low: No cache validators were captured

Neither ETag nor Last-Modified was present.
Add ETag or Last-Modified so repeat visits can revalidate efficiently.
